The arm armor.

Notably one of the first creations of Hacking Industries was the “Arm armor”. The first creation consisted of “Aug. Magic Foam Texture Paper - 4X4inch White Cellulose Cards, DIY Art Craft Supplies For Acrylics and ”, and “Colorations Regular Natural Wood Craft Sticks”

This fell apart very fast.

The second iteration was made from plain scrap cardboard and included a shield designated as the “Energy Deflector.”

This second armor was really good when it came to punches.

**However all of these creations are
missing to action.**
